## Purpose

This procedure details how the University embeds a culture of 'no tolerance' for child abuse and implements the child safe standards across all areas of University operations. The Procedure provides advice regarding the University risk management framework, adherence to the University and external legislation, focused actions for Aboriginal young people, educating staff, managing complaints and promotion of awareness strategies. This procedure will ensure that the fundamental rights of all children to be safe from harm will be undertaken through the following:

- Preventing all forms of child abuse, identifying risks early, and removing / reducing those risks.
- Complying with the legal and moral obligations of the University Community in reporting allegations of child abuse, and alerting the appropriate authorities if there is a reasonable belief a child is in need of protection.
- Upholding the safety of all children, including Aboriginal children, children from culturally and/or linguistically diverse backgrounds, children with a disability and from gender diverse and religious backgrounds.
- Providing regular training and education to members of the University Community on the risks of child abuse.
- Adverse risk associated with online presence (i.e. aligned to online learning and/or social media associated with the University).

This procedure aims to address the key Victorian standards and ten principles outlined in the [National Principles for Child Safe Organisations \(Feb 2019\)](#).

## Scope

It is a shared and collective responsibility of all members of the University Community to create a child safe culture and environment.

This procedure applies to all interactions with children (<18 years of age) associated with the University.
